

Remote Healing

Nonlocal Information Medicine and the Akashic Field

MARIA SAGI, Ph.D.

Introduction by ERVIN LASZLO

A practical guide to the Sagi method of healing across space and time

- Shows that we can interact with the Akashic information field to diagnose and treat illnesses nonlocally and that the effects are controllable and verifiable
- Details techniques for diagnosing and transferring healing information at a distance, using geometric symbols to treat acute infections and reduce pain, and integrating information medicine with homeopathy and chakra therapy
- Shares the author's development of her method, including stories of successful remote healings and her interactions with pioneers such as Erich Körbler

Remote healing is healing over space and time. Often called “nonlocal healing,” it is no longer a magical occurrence or a mysterious technique reserved for powerful shamans. Remote healing has moved from magic to science, and it can be learned.

In this practical guide to the Sagi method of information medicine, Maria Sagi, Ph.D., reveals that nonlocal healing is a quantum science that works through the transmission of information and that its effects can be controlled and verified. Drawing on the Akashic information field of Ervin Laszlo, she explains that the universe is not a mechanical system composed of matter—it operates like an overarching network that runs on and is connected by information. Cosmic information “in-forms” and underlies the whole physical world, including the human body. Sharing stories of successful remote healings she facilitated and her interactions with pioneers Erich Körbler, Gordon Flint, and Franz Stern, Sagi shows that we can access the Akashic information field to diagnose illnesses, treat symptoms, and heal the causes of disease, whether we are in the same room as our patient or on the other side of the earth.

Moving beyond the theoretical to the practical, Sagi explains how to diagnose and treat someone with information and how to attune to the information emanating from the patient. She shares techniques for transferring healing information across space and time by using geometric symbols to treat acute illnesses and infections and reduce pain. The author also explores how to integrate information medicine with homeopathy and how to diagnose through photographs, through the chakras, and through morphic patterns in the Akashic information field.

Opening up a new dimension in the art and science of healing, Maria Sagi demonstrates that by working with the Akashic information field we can trigger the body's self-healing mechanisms and restore order to a person's energy and information systems.

Maria Sagi holds a Ph.D. in psychology from the Eötvös Loránd University of Budapest. The creator of the Sagi method of informational healing and diagnosis, she is the author of 12 books and more than 150 articles and research papers published in Hungarian and translated into English, French, German, Italian, and Japanese. The science director for the Club of Budapest, she lives in Budapest, Hungary.
