

John Hunt Publishing - **O-BOOKS** - announces the new title

Healing with Information

The new homeopathy

Maria Sagi

With the discovery of information as the basic 'software' of living systems came the realization that malfunction in the living system can be treated by correcting the information that causes the malfunction. With this milestone book by a long-standing practitioner of this new kind of medicine, the door is opened to every healer and physician to complement his or her healing practice by diagnosing the cause of their patients' health problems before they manifest as disease, and correcting the malfunction with non-invasive, testable and reproducible 'soft' methods. This is information medicine, the cutting edge in the development of modern medical science; not an alternative to the tried and tested methods of biochemical medicine but a remarkably effective and readily acquired complement to it.

Author Bio

Maria Sagi holds a Ph.D. in psychology at the Eotvos Lorand University of Budapest. Following seven years of intensive research, she was awarded the C.Sc. degree (Candidate of the Hungarian Academy of Sciences). Dr. Sagi developed the information-medicine protocol pioneered by Austrian scientist Erich Koerbler into an encompassing method for diagnosing and treating human health problems. She is the author or co-author of eleven books and over one-hundred and fifty articles and research papers published in Hungarian and translated into English, French, German, Italian and Japanese, on topics as diverse as social and personality psychology, the psychology of music and art, in addition to information medicine, her principal field.

Endorsements

... *This book is a fundamental, almost encyclopedic reference for anyone who is seriously interested in new developments in the art and science of healing.*
Ervin Laszlo

I highly recommend the contents of Healing With Information, especially for practitioners of allopathic and complementary medicine modalities. The knowledge offered in this important work will expand their horizons and further empower their healing work. The new insights provide a master key that unlocks the science by which energetic patterns in the environment, and those created by thoughts, attitudes and beliefs, create the conditions of our body and our experiences in the external world. **Bruce H Lipton**

This valuable text by Dr. Sagi, which takes up and continues Erich Körbler's research – Körbler is the founder of the discipline called "New Homeopathy" – thoroughly analyzes and explains these mechanisms with the aid of numerous experiments and practical examples. In the wake of the studies of Popp, Del Giudice, Laszlo and others, the author explains how to detect the interference of subtle, electrical and electromagnetic energies acting on the cell, and the systems to restore the impaired balance. **Claudio Mazza**

It is a fascinating book, full of information and data which are completely new and original, but are, to be sure, definitely beyond the understanding of science, especially of mainstream Medicine. The concept of cause and effect in healing still is fundamental, obviously, but it is beyond the generally recognized paradigms, which are linear and mechanical. If you have a free spirit, interested in looking at reality with new eyes, don't be discouraged by the effort needed to address these new scenarios. They are worth it!!!
Alessandro Pizzoccaro

The book of Maria Sagi provides a complete synthesis that every person should know in order not to damage his or her own organic equilibrium and the equilibrium of the ecology. It is a book that should be read particularly by

physicians and all people interested in questions of health and healing. **Dr. Pier Mario Biava**

I commend the wealth of knowledge contained in this book to all my medical doctor colleagues who have the dynamism, courage, motivation and love of the medical profession to acquire ever new knowledge and familiarize themselves with even lesser-known methods of treatment. Taking possession of such knowledge and forms of treatment and integrating further tools in the repertoire of our already existing therapeutic toolkit, they will be able to ensure an even better and more extensive treatment for their patients. I can vouch for their experiencing much success and appreciation in their practice. **Dr. Erzsébet Tusor**

Erich Körbler and the scientific approach he termed New Homeopathy integrate the physical concepts of energetics, informatics and wave theory into the conceptual structures not only of medicine but also of our everyday thinking. The authors of the present book trace this fascinating intellectual process, creating something that is of lasting value not only from the 'popular' but also from the scientific point of view. **Dr. Robert Csiszár MD**
